## AutoCAD Crack +

Go to the menu bar and open the menu command 'file' and open the menu command 'NEW' and select the menu command 'NEW STEP'. Create a new file and set the filename to '\*AutocadSteps.bat' and click on 'OK'. Then open the AutocadSteps.bat file and add the following line of code to it. autocadstep\_Activate -INI PATH C:\Program Files\Autodesk\AutoCAD 2014\acadstep.ini Save the file and exit the AutocadSteps.bat file. Now, all the AutocadSteps.bat file does is tell Autocad to look in the specified path for a file with the specified name. The.ini file is a special file that Autocad uses to remember settings and to tell it what it should do when opening certain files. If you are using the add-on CD you will have to manually set up the settings by going to the Menu bar and opening 'Add-ons' then 'Additional Information' then 'Settings' and then 'Additional Settings'. The settings are: C:\Users\Public\Documents\Autodesk\AutoCAD 2013 or C:\Users\Public\Documents\Autodesk\AutoCAD 2014 AutoCAD Settings\Software\Autodesk\AutoCAD or AutoCAD Settings\Software\Autodesk\AutoCAD 2014\Add-on CD. ACME\Addon\ and ACME\Addon\Windows\ If you're using the MS Office Add-on CD then go to 'Add-ons' then 'Additional Information' then 'Customize'. and then add the following lines of code to the.ini file: Customize\Add-ons\MS Office Add-on CD. AutoCAD Settings\Software\Autodesk\AutoCAD or AutoCAD Settings\Software\Autodesk\AutoCAD 2014\Add-on CD. Then save the file. If you want to disable the add-on CD (if for some reason you want to use the standalone.exe instead) then you can simply set the.ini file to: C:\Users\Public\Documents\Autodesk\AutoCAD 2013 or C:\Users\Public\Documents\Autodesk\AutoCAD 2014 AutoCAD Settings\Software\Autodesk
