Glee Club is a step-back in tone and grit, but also in dreamy "glorious" Americana. We have none of the squawkiness and faux-pop-punk of Glee Club, no Beatles or Rolling Stones, no Grateful Dead, no Beatles or Rolling Stones. But what we do have is a confident assurance that life is unpredictable, that the next song is going to feature a jazzy riff, a fun-loving lyric. A lot of people may be glad that Glee Club is gone, but the astonishing thing is that it wasn't always gone. Consider that it first appeared in a 1975 issue of Harvard Square magazine, entitled Music from Wellesley College. By 1980, Glee Club had transitioned from the Harvard Square student newspaper to the Harvard Crimson. "I was in class, as usual, on that last day of final exams before summer vacation," Michael McBride writes in Seeing Double. "I happened to glance up, and there it was, staring at me from the front page of the Crimson. There it was, as vivid, as real, as ever." That is true of so many things, it has to be said. In this case, McBride continues, "I hurried to my dorm, and put on a casual tracksuit. I decided to visit Glee Club."
