“Player animations are fundamentally different from what we've done in the past,” said Oliver Martens, FIFA Lead Producer. “Previous FIFA games used motion capture data as a starting point to create stylized animations where the goal was to make the motions look as close as possible to a real player's movements. This time, our mission was to get to the core of the athlete's movements as they would naturally occur when executing a football move. The result is more authentic, faster, and more exciting looking.” FIFA 21 allowed players to share their licensed player data (LPD) as an in-game item, a feature that has been introduced for the first time in FIFA 22. LPD allows players to access visual customization options within the FIFA 22 user interface that will create styles based on pre-set moves and finishing animations. FIFA 22 also introduces “Cardio Plus” support, which allows all players to train and compete at a heart rate up to 18% higher than last year's FIFA. FIFA 22 is a large year-over-year update in terms of production and feature additions, but also introduces a new, deeper “power-up” progression system that allows players to learn new skills and attributes. Players earn experience points for each match in the FIFA Ultimate Team (FUT) mode that unlock new customization options, new Football Stars (“Team of the Year”), and the ability to control players on the field. First-Person Shooters (FPS) have been making real strides in recent years, and are getting pretty close to being the most popular genre of videogame today. If the stats are any indication, it is FIFA that is leading the charge. As a result of the popularity of the FIFA franchise, it is also gaining a formidable following of people. The fastest growing audience to the games is the “kids,” the youngest demographic among videogamers. The FIFA World Cup runs from June 12th to July 13th of 2014. The game will be out for PlayStation 4, Xbox One, and PC. We know that FIFA 19 will be out in late October, which also happens to be the release date for the new Star Wars game Battlefront II and the Grand Theft Auto V remaster. (I am going to be working on getting GTA V setup on my PS4, I heard that was going to be quite a process). You can expect to see
